

Making a card photo frame from packaging card

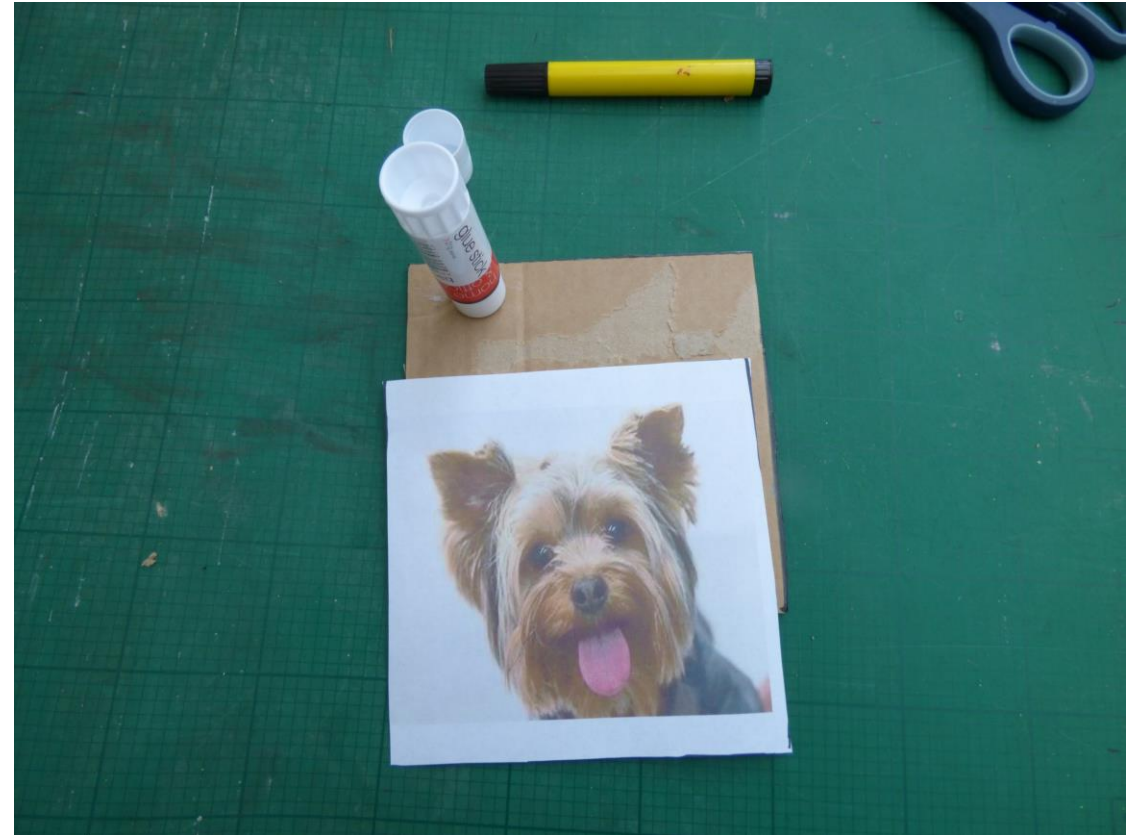

Take a card packaging box and mark out at least 4 strips 1.5cm wide and 20cm long and cut out.

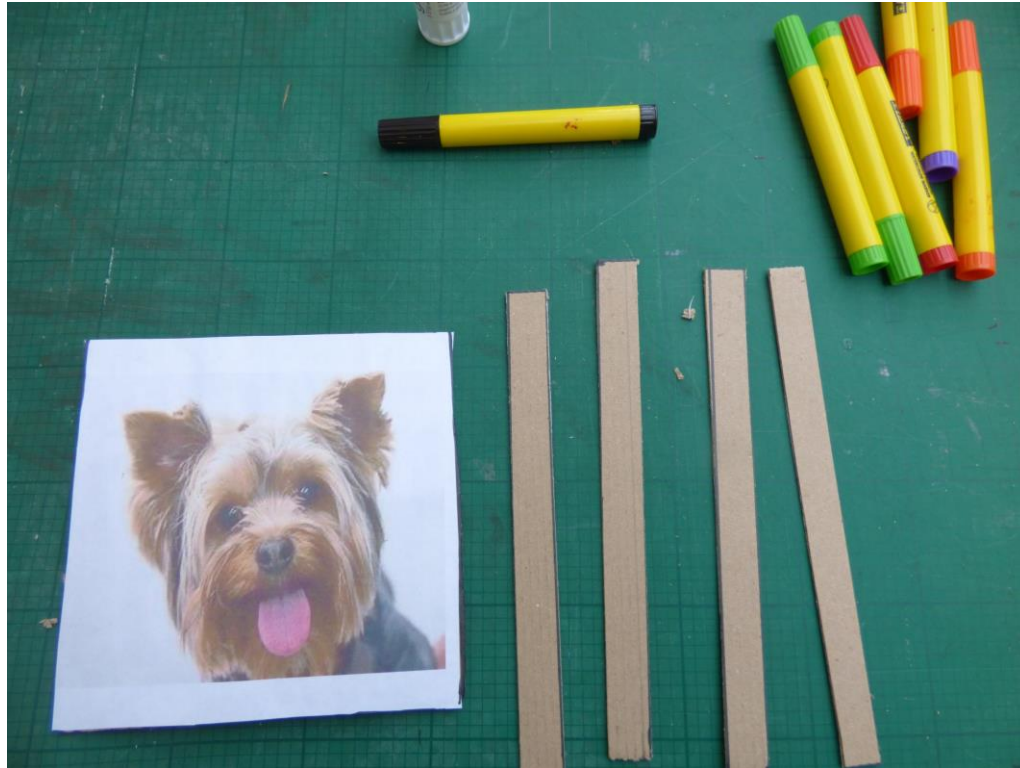

Mark out a square 15cm x 15cm from another part of the box and cut out.

3. Take a picture you have or print one from the internet and use the 15cm square card to mark out the size.

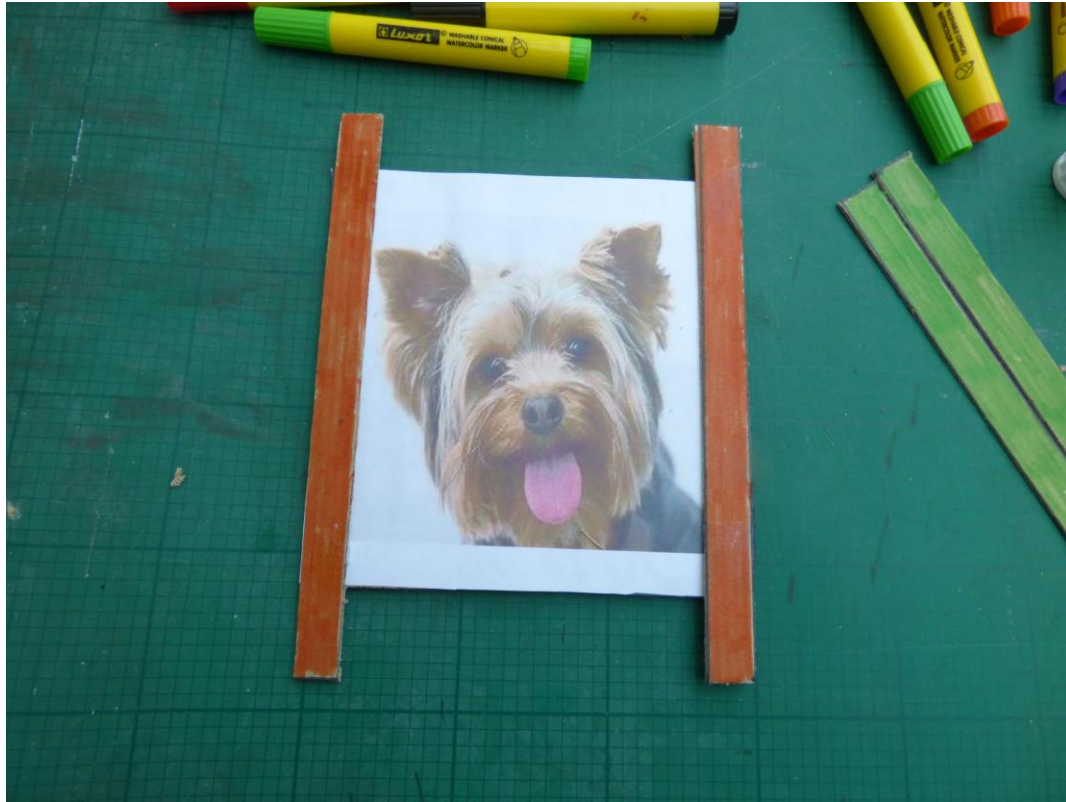

4. Cut out the picture and stick it to the backing card

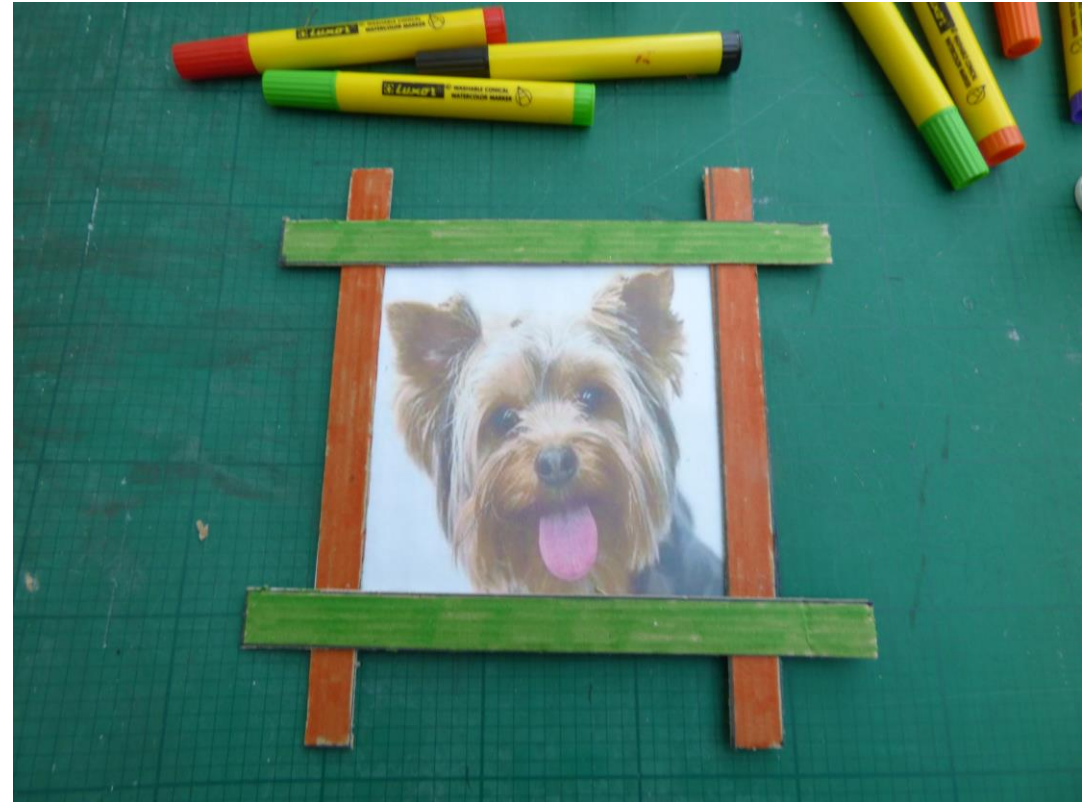

5. Take your 4 strips of card and make sure they will fit on your frame

6. Now colour in the 4 strips with felt tip or paint

7. Stick 2 strips vertical to the edge of the picture with a glue stick.

8. Stick 2 strips horizontal to the edge of the picture with a glue stick. This completes the frame. You could add more decoration, glitter or cut shapes, it's up to you!
